PECAN TREES MAKE THE BEST OF SHADE AROUND THE HOME

TO OUR FRIENDS AND PATRONS:

We have been in the Pecan Nursery business 24 years now and are the oldest exclusive Pecan Nursery in the State. We feel grateful to all our customers for their continued support, and for the good reports they are sending us about the trees bought from us.

In our main trade territory—Texas, Louisiana and Oklahoma—our trees are proving to be the best in all localities where they have been set. We have a very fine lot of trees for the coming season, and at a much reduced price. Take advantage of the chance to start your orchard now.

A Pecan Orchard on every farm would solve the problem of over-production in Cotton. Reduce your cotton planting and increase your Orchard. One acre of Pecans will bring you more money than ten acres of cotton each year and with much less work.

PRICE LIST 1931-1932

	Each	Per 10	Per 100
2 to 3 feet	\$.80	\$ 7.00	\$ 60.00
3 to 4 feet	.95	8.50	75.00
4 to 5 feet	1.10	10.00	90.00
5 to 6 feet	1.25	11.00	105.00
6 to 7 feet	1.50	13.50	120.00
7 to 8 feet	2.00	15.00	135.00
8 to 9 feet	2.50	22.50	200.00
9 to 10 feet	3.00	27.50	250.00
10 and up	4.00	35.00	300.00

Our varieties are the Odom, Stuart, Money-Maker, Sabine, Schley and Success.

We also have a few Burkett.

CONDITIONS OF SALE—We take great care to send out only strong, vigorous trees, budded and grafted with the above mentioned varieties. Carefully packed and delivered to the express or railroad company at Jasper or Newton, Texas, or Leesville, Louisiana.

GUARANTEE—We guarantee our trees to be true to name, and if by accident any should be sent under wrong label, they will be replaced free of charge.

REPLACEMENTS—Under usual conditions ninety-five to one hundred per cent of our Pecan trees live. But should any of them fail to grow, we will replace within one year, at half price any Pecan trees that die, where properly planted and cared for. We want to assist you in every way to make a success of your Orchard.

Cash should accompany all orders not accompanied by satisfactory references.

THIS PICTURE TAKEN IN OUR NURSERY, BETTER PECAN TREES ARE NOT GROWN

SOY BEANS GROWING IN YOUNG PECAN ORCHARD.
A FINE SOIL BUILDOR.

HOW TO SET OUT PECAN TREES—Dig a hole about two feet across and deep enough to set the trees about one inch deeper than it stood in the Nursery. Cut off all bruised roots, and be careful to spread out the roots to their natural position. Tamp the soil well around the roots and use rich top soil for filling in around the roots.

Cut back the tops of the pecan trees when set out about one-third or half, they grow off better when pruned back. On all the larger sizes we will do this for you before shipping, that will save weight also and be less express.

WHEN YOU FIRST RECEIVE THE TREES—Water the roots good and keep moist until they are set into the ground. If you are not ready to set them out heel them in good. Take the packing off before heeling in, they will keep then as long as you wish.

The necessity of setting out a good orchard cannot be too forcibly impressed. If you have the land, by all means set out some pecan trees. The initial cost is so insignificant as not to be considered when estimating the ultimate value of the orchard.

We will gladly answer any question you may ask regarding setting out your orchard, and if you so desire, we will take pleasure in visiting your place, inspect your land and pass on the merits of an orchard on your place. We have made a special study of the nursery business and our experience and time is placed at your disposal. If you have business that takes your time we can set out the orchard for you.

We have no agents. We sell direct to the trade and save our customers the profit that agents would get. Our reputation is at stake, therefore we are obliged to treat every customer with the same fairness and honesty.

R. L. ODOM'S ORCHARD, WHERE WE GET BUDDING WOOD FOR OUR NURSERIES

OUR LOCATION
—We are located in East Texas, 150 miles north of the Gulf, where climatic conditions are most favorable for growing strong, sturdy trees.

Sabine Valley Pecan Nurseries

R. L. ODOM, General Manager

JASPER, TEXAS

This orchard was set with our trees twelve years ago by Mr. W. C. Lenahan, of Toledo, Texas. Mr. Lenahan is 73 years old and is still setting Pecan trees every year.

This orchard averaged 400 pounds to the acre at 11 years old, and has been bearing since it was four years old. The crop between these trees is Soy Beans.

SLOGAN

"A PECAN ORCHARD ON EVERY FARM"

The Safest Investment in the South Today is a Paper Shell Pecan Orchard.
